### PROFILE

I am a motivated Full Stack Web Developer with one year of experience at SoftBd LTD, where I contributed to real-world projects using JavaScript, React, Laravel and MySQL. I enjoy tackling challenges in both frontend and backend development and I'm committed to building high-quality, scalable applications.

### WORK EXPERIENCE

#### SOFTBD LTD

JULY 2023 - CURRENT

##### Junior Software Engineer

- Actively contributed to real-world projects, collaborating closely with team-member, gaining valuable hands-on experience in full-stack web development.
- Acquired and applied new technologies, including modern PHP techniques and Laravel best practices, significantly enhancing my problem-solving and project execution skills.

### PROJECT SHOWCASE

#### Organization Management

[Github-link](#)

Developed an organization management system with user roles (Super, Admin, Member) where Super users can manage organizations and subscriptions with installment tracking while Admins handle assigned organizations and Members join organization and pay installments with penalties if overdue.

**Feature:** Role-based permission, Organization and Subscription Management, Installment Tracking, Payment Penalty, Validation, Authentication, Authorization, Google Login, Email, File Uploads.

**Technology:** Laravel, Livewire, Alpine.js, TailwindCss, MySQL, Nginx, Gmail.

#### Jukto News

[Live-link](#)

Contributed to the development of Jukto News, a news aggregation platform that offers up-to-date news articles from various categories, providing users with streamlined content management, real-time updates, and interactive UI components. Assisted with frontend functionality and ensuring efficient performance and user engagement.

**Feature:** Content aggregation, news scraping real-time updates, user-friendly navigation, interactive news display & responsive design.

**Technology:** Laravel (PHP), React, MySQL, Tailwind CSS, REST APIs.

#### Pizza Fast Food

[Live-Link](#)

A pizza ordering web application built with React. Allowing users to browse a pizza menu, add pizza's to cart, place an order. The app features a dynamic cart system with location-based address filling, order prioritization. Users can track their orders and receive delivery time details with real-time data from the server.

**Feature:** Pizza menu, Cart management, GeoLocation API, Order Tracking

**Technology:** React, React-Router-DOM, Context API, Redux, Form Validation, API, TailwindCSS.

### EDUCATION

#### Diploma in Computer Science

2021 - 2024

Feni Computer Institute, Feni

GPA: 3.89 / 4.0
